HF MOONBOUNCE EXPERIMENT - JANUARY 19-20/2008

(January 17, 2008 - js, tnx on5zo) The HF Active Auroral Research Program (HAARP) in Alaska and the Long Wavelength Array (LWA) in New Mexico are planning an additional lunar echo experiment for January 18-19.

Interested radio amateurs are invited to participate in this experiment by listening for the lunar echoes and submitting reports. On **January 19**, listen on 6.7925 MHz from 0500-0600z, and on 7.4075 MHz from 0600-0700z. On **January 20**, listen on 6.7925 MHz from 0630-0730z and on 7.4075 MHz from 0730-0830z (depending on frequency occupancy at the time of operation, it may be necessary to adjust the frequency slightly).

Based on previous experiments, investigators believe it should be possible to hear the lunar echoes with a standard communications receiver and a simple 40 meter dipole antenna. The format for the transmissions will follow a five second cycle beginning on the hour and repeating continuously. The HAARP transmitter will transmit for the first two seconds. The next three seconds will be quiet to listen for the lunar echo. Then HAARP will transmit again for two seconds, repeating the cycle for one hour. In the second hour, this five second repetitive cycle will be repeated at a different frequency. All transmissions from HAARP will be CW (no modulation).

Investigators are interested in receiving signal reports from radio amateurs who may be able to detect - or not detect- the lunar echo or the transmitted skywave pulse from HAARP. Submit reports via e-mail to mbreport@haarp.alaska.edu and list your call sign and the type and location of your receiving equipment and antennas.

ON4NVO - NATIONAAL VISSERIJMUSEUM OOSTDUINKERKE

(5 juli 2008 - js) Het vernieuwde Nationale Visserijmuseum in Oostduinkerke opende vorig weekend zijn deuren in aanwezigheid van minister Geert Bourgeois en provinciegouverneur Paul Breyne. Het museum is in een nieuw en modern kleedje herbouwd. Het is in oppervlakte drie keer zo groot als voorheen. Het geheel vertelt meer dan vroeger het verhaal van de visser, met af en toe een hevige storm in een interactief decor. De paradepaardjes zijn ongetwijfeld de gerestaureerde vissersboot OD1 Martha en de spectaculaire aquaria.

Voor de radioamateur heeft de conservator Willem Lansweert - ON3WLS, een verrassing in petto. Er is namelijk een radioamateurstation aanwezig op deze site. Het station maakt gebruik van de roepletters 'ON4NVO' (Nationaal Visserijmuseum Oostduinkerke). Elk UBA-lid kan op vertoon van zijn licentie toegang krijgen tot het radioamateur station van het nationaal visserijmuseum. Er zijn aparte faciliteiten voor de ON3-operatoren. Indien je als wederdienst een half uurtje het station bezet krijg je als radioamateur samen met je gezin gratis toegang tot het museum.

Uniek is dat het station werd ingewerkt in een authentieke console van het legendarische 'Oostende radio'. Oostende radio is voor alle vissers en koopvaarders het moederstation. Het is de link met het thuisfront. Hoeveel scheepslui hebben niet via 'OST' een telefoongesprekje gevoerd met moeder de vrouw, om dan nog niet te spreken over de veiligheidsfunctie die het station 'OST' tot op heden nog steeds actief uitvoert. OP00L - PATRIOT HILLS / ANTARCTICA

(November 4, 2008 - js) OP00L has been granted to a clubstation of the Belgian Union of Radio Amateurs (UBA) on Antarctica. The location during the Antarctic summer season 2008-2009 will be the Multinational Base Camp Patriot Hills at 80° 18.11'S - 081° 20.69'W. Operations are planned [between 10 November and 18 December](#) by ON5XX. This is not a DXpedition but a professional visit to Antarctica. Operations on the HAM bands depend totally on workload and power availability. The preferred mode will be CW but if the situation allows, some SSB and Digimodes are possible. The operator is not an experienced CW contester or DXpeditioner so pile ups might not be handled as smoothly as you expect. Thanks for your understanding.

QSL via ON5XX. Please keep in mind that the QSL handling will only start at the end of January. This is only for practical reasons.

V8FKT - BRUNEI

(November 3, 2008 - js) Ian G3YBY will be QRV as V8FKT from [November 9 to 21](#) for a holiday style DXpedition. Bands to be worked will be from 40m to 15m SSB & RTTY.

The raid that sunk the Tirpitz was conducted by planes from 617 SQN. The station will be operating on ALL bands and various modes. Look out for GB617SQN on the DX Cluster.

21st HOMEBREW & OLDTIME EQUIPMENT PARTY

(October 25, 2008 - js) A touch of chirp possibly will be in the air when the QRP Contest Community (QRPCC) cordially is inviting to the 21st HOT Party on [November 16, 2008](#), 80 and 40m. Once a year homebrewers and enthusiasts of oldtime-equipment together are introducing their creations on the HOT Party. A taste of chirp is in the air and switching from transmitting to receiving may last a little longer... Skilful revived museum pieces are giving signs of life as well as brandnew constructions around ICs and SMD. Loving restored and maintained commercial radio equipment meets rigorous homebrewing.

You don't need a complete homebrewed station or a complete "line". An old RX or a homemade TX "stand alone" is sufficient for your entrance. No "taboos" like a 5W-QRP-limit narrows down the freedom of this meeting on the air. "Anything goes" like "HOT" suggests? Not quite so: the coincidence of "buy & plug & play & don't have the slightest idea about anything" is invited to stay outside the PARTY.

TM6VG - VENDÉE GLOBE

(October 24, 2008 - js) Radio Club Vendée is organizing a special activity around the Vendée Globe race. The team will sign TM6VG from [November 1st to 15th](#). They will be QRV on all HF bands from 160 to 10m, included WARC bands, and VHF 2m, using CW, SSB, and various digital modes.
