IOTA CHECKPOINT: REMINDER

(February 14, 2009 - js) In his email of 4 June 2008, Martin Atherton mentioned a policy decision on the treatment of contacts made with **second/third current callsigns** has been deferred to a later date since it involves procedural changes. This remains the situation and it does not look as if it will be addressed soon. Therefore, the RSGB cannot credit these QSOs. In several countries second current calls are available but it is impossible for the RSGB to keep note of whether these are special event calls, contest calls or personal calls issued only for personal use.

In clear text: please note that any QSL card issued to any other callsign than the one you registered with will be rejected for the time being!

VERMIDD CLUSTERVERVUILING

(27 januari 2009 - js) De DX-cluster is een mooi werktuig als het goed gebruikt wordt. Gelieve volgende regels in acht te nemen:

Stuur enkel een DX-spot door als iemand anders daar iets aan heeft. Dus geen stations spotten die jou aanroepen op je eigen frequentie.

Spot enkel DX of een speciaal station of roepteken

Spot nooit je eigen call! Roep CQ in de plaats.

"ON" spotten vanuit België is geen DX!

Vooraleer je een spot geeft: ga na of die zonet niet is gegeven door een ander station

Geef geen onnodige spot om te tonen dat je de DX ook hebt gewerkt!

Bedank het DX-station niet via een onnodige dxspot!

Doe geen "ann" of "dxspot" voor een vraag naar QSL-info! Er bestaan voldoende tools op het internet en ook in de databases op de clusters.

Gebruik "ann" niet om ruzie te maken of iemand uit te schelden!

Gebruik de "dx" en "announce" spots niet om met elkaar te chatten!

Als je een clusterconcentratorprogramma gebruikt, connecteer dan maximum met 3 clusters.
